Le bon | company profile

„Originality and uniqueness arise where you trust your dream“

That is exactly how we have been building the Le bon brand since 1996. Original, personal and with a sense for detail. As in any relationship, the outcome of our work is based on discussion with our clients, who often become friends. Together we discover your space, choose materials and the best functional solutions. Someone calls such a process designing. We call it the world of Le bon.

Le bon is an innovative designer and producer brand from the Czech Republic. Its inspiring bathroom furniture and kitchens make you feel at home.
